

Resource and Support Guide for Local Law Enforcement in Illinois

March 27, 2020

In order to provide guidance to all local law enforcement during this emergency, ISP, ILEAS and the National Guard have worked together to create three Regional Law Enforcement Support Centers. These Centers will give law enforcement agencies a place to go with questions or needs that are not emergencies and not official EMA equipment related requests. This document outlines the three pathways for local law enforcement to get support, resources, advice, guidance and help during the COVID19 emergency. The three paths for help are:

Emergencies

Resources

Information/Support

EMERGENCY MUTUAL AID

Requesting emergency mutual aid does not change. For situations such as barricaded subjects, large accidents, shootings and severe weather call Northwest Central Dispatch at 1-847-590-3500. Assistance will be dispatched as is standard procedure. Nothing changes.

COVID19 RELATED RESOURCE REQUESTS

If you have a need for equipment, significant staffing resources, assistance from some non-law enforcement State agency or other organization, then you should direct those requests to your local accredited Emergency Management Agency. That request will then be forwarded to the State Emergency Operations Center for consideration. This includes jersey barriers, IDOT trucks, PPE, Public Health resources, etc.

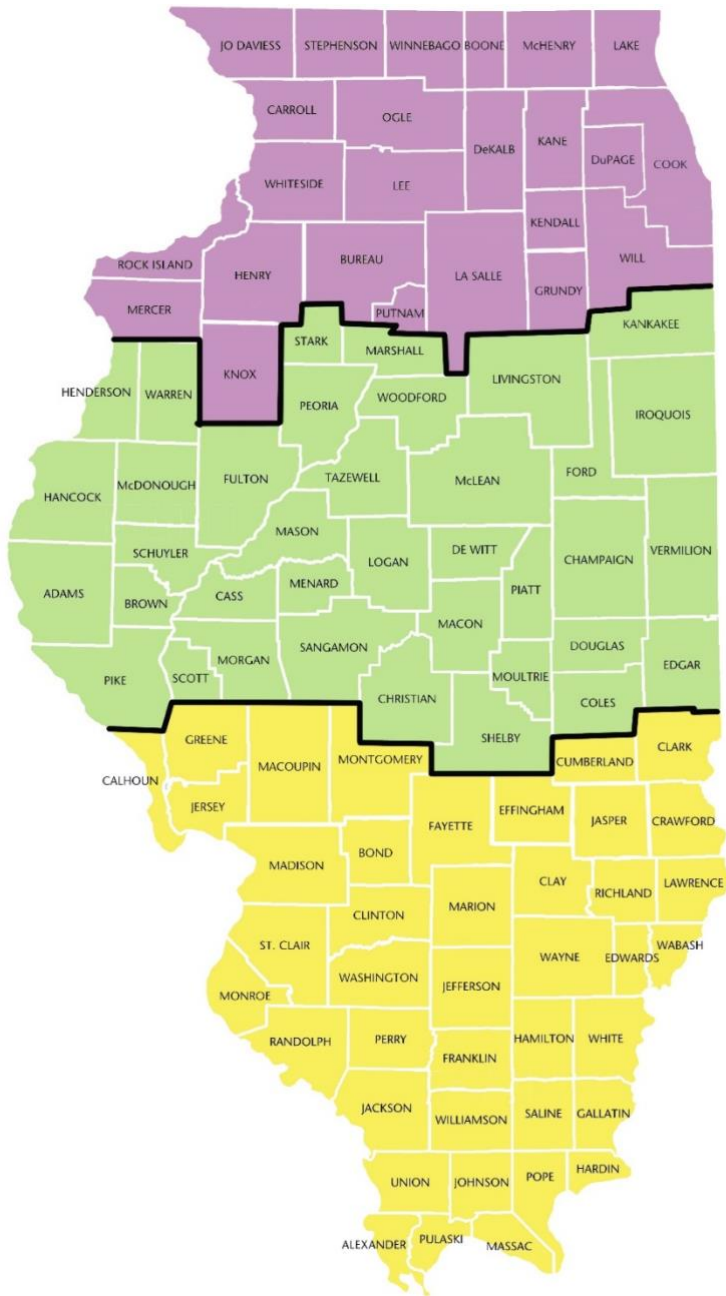

COVID19 RELATED ISSUES, PLANNING SUPPORT, INFORMATION, ADVICE

Questions for any COVID19 related issue that local law enforcement may have, Regional Law Enforcement Support Centers (LESC) have been established to work with agencies to solve them. The LESG is staffed by an ILEAS Regional Planning Coordinator, an Illinois State Police command-level officer and a National Guard representative. There are three located North, Central and South. They are designed to assist you with issues that include but are not limited to:

- Sources about Executive Order enforcement
- Where to find documents, links & resources to educate your agency and answer questions
- A COVID19 related event is going to happen in your jurisdiction - for instance a testing center opening up – and you need advice or planning support or liaison to other agencies to coordinate a local response
- A communications related issue – radios, PSAP support thru the 9-1-1 ISP office, potential need for ILTERT, etc.
- A shortage of staffing due to sickness, quarantine, etc. that will affect your ability to provide police services
- Corrections related issues
- Any other non-emergency related requests for information.

Requests for support from the Law Enforcement Support Centers can be accessed by contacting your ILEAS Regional Planning Coordinator, your ISP District Command or directly using the information on the LESG map.

REGIONAL LAW ENFORCEMENT SUPPORT CENTER LOCATIONS & CONTACT INFORMATION

LESC North

isp.lesc.north@illinois.gov

ISP Major Robert Meeder
ISP Captain Jason Lococo
